

CAM752

Stunning Anti-Vandal Dome

Engineered from Solid Aluminium & with NiteDevil technology

Each of these NiteDevil varifocal dome cameras has been engineered from a solid piece of aluminium to produce a truly exceptional product.

The domes' stunning looks means that they look the part in any environment such as shops, bars, schools and offices.

NiteDevil EXPLAINED

One of the main advantages of NiteDevil's lower light technology is there is no limit to the distance the camera will see (other than the lens that is fitted) as it uses the overall illumination of the area it covers rather than relying upon the maximum distance and spread of IR light.

See the images below. In image 1 the IR camera can highlight the red car and that is it, however the same area when viewed by the NiteDevil technology (in image 2) can see a much wider and longer scene. The NiteDevil camera is actually getting all the light it needs for this from moonlight.

IR camera view

NiteDevil camera view

In these pictures the moon is three quarters full in both examples. These are actual video clips of NiteDevil actual video performance using only moonlight as the source of illumination on the NiteDevil website: www.nitedevil.com
