

How do I connect my

Advanced Vision Camera

to get a good picture?

CAM424

The Advanced Vision cameras have a terminal strip connection. There are four connections which are positive, negative, video and audio.

1. Connect the 12V regulated power supply to the positive and negative connections.
2. Connect the centre video connection from the RG59 to the yellow video connector.

3. Connect the screen of the RG59 to the negative connection, thus earthing it.

Earthing the video screen should only be necessary at the camera end.

Please Note

These "Technical Tips" help sheets aim to answer commonly asked questions in a concise and informative manner - they are for advice & guidance only and do not replace any of the manuals or other literature supplied with our products.
