

How To:

Get a **12V DC output** with only a 24V AC PSU installed

The VoltDevil is a handy power supply converter that works by accepting any 18-24 AC and converting it to a regulated 12V DC output.

This means that you can use these devices adjacent to your camera to ensure that you are supplying the camera with a quality 12V DC regulated supply. See how our VoltDevil power supply converter fits easily into a typical CCTV set-up:

With quick fit terminal strip connections!

Provides a 12V output from a 18-24V AC input!

Useful for converting a 24V AC supply from a power source or PTZ equipment into a regulated 12V DC supply for a camera.

Please Note

These "Technical Tips" help sheets aim to answer commonly asked questions in a concise and informative manner - they are for advice & guidance only and do not replace any of the manuals or other literature supplied with our products.
