

System Idea

Add a PTZ to an existing system...
..and control it from a different location.

3 Video signals in one direction,
1 RS485 signal in the opposite direction.

CCTV Mule™

Add extra cameras including a PTZ to an existing system using the RG59 cabling already installed. Perfect if you don't have access to run any more cables or even data cables underground!

The clever electronics of the Mule4 allow it to carry the RS485 data along the same RG59 co-ax cable enabling the operator to monitor and control the system from a different location.

Please Note

These "Technical Tips" help sheets aim to answer commonly asked questions in a concise and informative manner - they are for advice & guidance only and do not replace any of the manuals or other literature supplied with our products.
